[Good Code Editor For Mac](#)

Next-gen printf to keep track of important values in your code. Just add a watch to an expression and the value will be streamed back to LT in real time.

```
{
  _x: 344299768.78025,
  _y: 688599537.5605,
  _z: 0,
  _order: 'XYZ',
  _quaternion: [Object] }
688599537.5605
```

No more printing to the console in order to view your results. Simply evaluate your code and the results will be displayed inline.

```
clojure.lang.ArityException: Wrong number of args (1) passed
    AFn.java:437 clojure.lang.AFn.throwArity
    Restfn.java:412 clojure.lang.Restfn.invoke
    NO_SOURCE_FILE:19 user/eval15559
```

Developer tools should be open source. Every bit of Light Table's code is available to the community because none of us are as smart as all of us.

```

behaviors ts
  obj connect (new $tag <specify>port ts))
  dup (reduce
    (fn res res)
      (if (aget (seen res) (-behavior-name res))
        (let (beh (-behavior-name
                    (when (exclusive beh)
                      (when (conf) (exclusive beh))
                      (doone (exclude (exclusive beh))
                        (aset (seen res) exclude true)
                        (aset (seen res) (-behavior-name
                                      (conf) (final res) res))
                        res))
          (seen res) (-behavior-name
                      (final (transient (dup))
                        (dup))
                        (persistent) (final (dup-duped))))))
        (-behavior-name (tag ts)
          (taggers (tags-behaviors ts) (tag))
          (listeners (obj instants)
            (obj)

```

Keymaps, behaviors, and Light Table's Behavior-Object-Tag engine means you can easily shape your IDE to whatever your work requires.

```

files [[:lt.objs.files/file-types [{"name "Wisp" :texts [:wisp] :
editor [[:lt.plugins.vim/activate-vim
  [:lt.objs.style/set-theme "ibdknox"]]
editor.python [[:lt.objs.style/set-theme "tomorrow-night"]]
editor.markdown [[:lt.objs.editor/wrap]
editor.plaintext [[:lt.objs.editor/wrap]]]

```

The plugin manager hooks into the central list of plugins so you don't have to go hunting all over the internet to find the ones you want.

Vim 0.0.2

HTML language plugin for Light Table

Python 0.0.2

Light Table is a lightweight, clean, and sleek interface with all of the power and functionality you need and expect from your editor.

```
doseq
  clojure.core

((seq-exprs & body))

Repeatedly executes body (presumably for side-effects) with
bindings and filtering as provided by "for". Does not retain
the head of the sequence. Returns nil.

(push arr #js [(.-length (split (str x) " ")) (str x) nil])
(.sort arr)
(close-out dir (reverse arr))
(aloop [i arr] (exit arr i (aget arr i 2)))
arr))
```
